

IgGI Shield

Oral Powder

IgGI Shield provides support for optimal homeostasis of the gut

OVERVIEW

Designs for Health IgGI Shield contains ImmunoLin®, a serum-derived bovine immunoglobulin (SBI)/protein isolate which is a dairy-free alternative to standard colostrum powders. It contains no lactose or milk proteins such as casein and β -lactoglobulin, which can be poorly tolerated by some people.

Nutrition Information			
Serving per package: 20 Serving size: 2.5 g			
	Per 2.5 g serve	%DI/RDI*	Quantity per 100 g
Energy	41 kJ 10 Cal	0% 0%	1623 kJ 388 Cal
Protein	2.3 g	5%	92.7 g
Fat, total - saturated fat	0.02 g 0.003 g	0% 0%	0.7 g 0.1 g
Carbohydrate - sugars	0.1 g 0.01 g	0% 0%	2.7 g 0.3 g
Fibre	0.1 g	0%	2.1 g
Sodium	14.9 mg	1%	596 mg
*Based on an average adult diet of 8700 kJ			

Active Ingredients (per 2.5 g dose)	
Total Protein	2.3 g (containing Immunoglobulin G 1.125 g)

Pack Size	50 g
Servings Per Pack	20 serves

Excipients
Nil

Directions for Use
Adults, mix 2.5 g with water and drink immediately once daily, or as directed by your healthcare professional.

Allergen Information
<ul style="list-style-type: none"> No added: Soy, gluten, dairy, nuts SBI is derived from a beef source, therefore, individuals who have an allergy to beef should not take this product.

Warnings
If symptoms persist, talk to your health professional.

Designed and packed in Australia from imported ingredients.

No Added Gluten

No Added Dairy

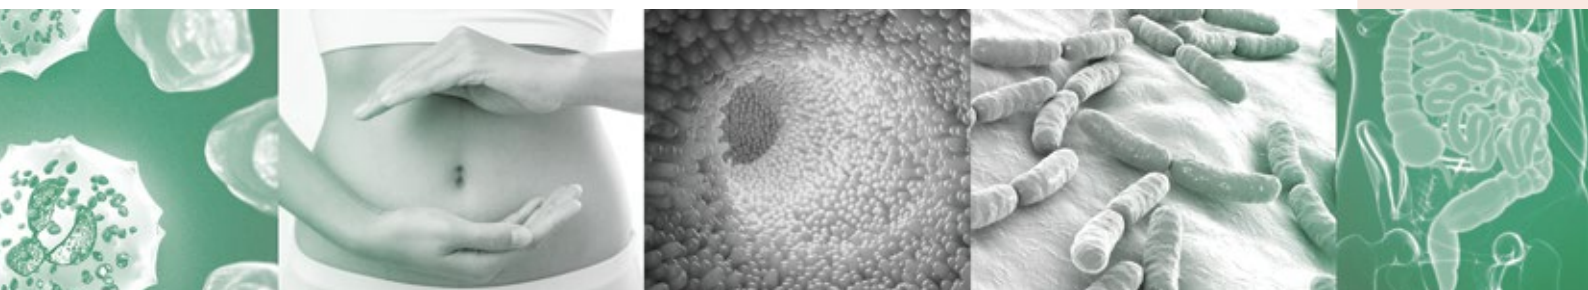

No Added Nuts

No Added Soy

No Artificial Flavours or Colours

EDUCATION

A healthy digestive system breaks down foods and liquids into carbohydrates, fats, and proteins so the body can absorb them as nutrients for growth and energy. It also contains much of the body's immune system, protecting against pathogens or other toxic substances consumed in food or water.

A way to support a healthy GI system is to consume active immune factors from another immunologically 'mature' individual and is best documented through the ingestion of breast milk containing high levels of immunoglobulins by a newborn infant.¹

Designs for Health IgGI Shield utilises the innovative ingredient ImmunoLin®. ImmunoLin® is a serum-derived bovine immunoglobulin/protein isolate (SBI) which has emerged as a unique alternative to bovine colostrum for the support of healthy digestion and immune function.²⁻⁷

SBI is comprised of over 90% protein and consists of more than 50% immunoglobulins, other peptides and growth factors found naturally in milk or colostrum. Proteomics techniques have identified over 180 unique proteins in SBI.

The mechanism by which immunoglobulins and other bioactive peptides found in SBI help to maintain gut barrier function is believed to be an overall effect on gut homeostasis, i.e. the healthy "balance" of a functioning intestinal tract, optimising digestion, mucosal health, nutrient utilisation and immune function.^{3-5,11}

SBI is involved in the direct binding of microbial components found naturally in the digestive tract⁸ without interfering with either the growth or composition of the commensal intestinal microbiome. It also has been shown to consistently improve food (caloric) intake and other nutritional parameters in a variety of different animal species.^{9,10}
